

**1. Expresa** las multiplicaciones como suma de sumandos iguales.

$$\bullet 4 + 4 + 4 + 4 + 4 = \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}.$$

$$\bullet 3 + 3 + 3 + 3 + 3 + 3 = \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}.$$

$$\bullet 7 + 7 + 7 + 7 + 7 + 7 + 7 + 7 = \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}.$$

$$\bullet 10 + 10 + 10 + 10 + 10 + 10 + 10 + 10 = \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}.$$

**2. Completa** las tablas de multiplicación.

$$\bullet 6 \times \underline{\hspace{2cm}} = 54$$

$$\bullet 9 \times 8 = \underline{\hspace{2cm}}$$

$$\bullet 8 \times 6 = \underline{\hspace{2cm}}$$

$$\bullet 7 \times 9 = \underline{\hspace{2cm}}$$

$$\bullet 6 \times \underline{\hspace{2cm}} = 36$$

$$\bullet \underline{\hspace{2cm}} \times 9 = 81$$

$$\bullet 8 \times \underline{\hspace{2cm}} = 64$$

$$\bullet 9 \times \underline{\hspace{2cm}} = 72$$

$$\bullet 6 \times 10 = \underline{\hspace{2cm}}$$

**3. Identifica** el patrón numérico y, luego, **completa**.

$$\bullet 6, 12, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, 66.$$

$$\bullet 7, 14, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, 77.$$

$$\bullet 8, 16, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, 88.$$

$$\bullet 9, 18, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, \underline{\hspace{2cm}}, 99.$$

**4. Resuelve** las siguientes multiplicaciones.

$$\bullet 236 \times 5 = \underline{\hspace{2cm}}$$

$$\bullet 5\,232 \times 3 = \underline{\hspace{2cm}}$$

$$\bullet 2\,920 \times 8 = \underline{\hspace{2cm}}$$

$$\bullet 752 \times 4 = \underline{\hspace{2cm}}$$

$$\bullet 1\,132 \times 25 = \underline{\hspace{2cm}}$$

$$\bullet 3\,125 \times 34 = \underline{\hspace{2cm}}$$

$$\bullet 1\,234 \times 7 = \underline{\hspace{2cm}}$$

$$\bullet 4\,013 \times 42 = \underline{\hspace{2cm}}$$

**5. Resuelve** los siguientes problemas.

A. En una librería se recibieron 25 cajas que contienen 246 libros cada una. ¿Cuántos libros se recibieron en la librería?

B. Una persona recibe todos los días 1 250 pesos. Al cabo de 28 días, ¿cuánto dinero habrá recibido en total?
